Issue 04

Quality Care Given to every Shipment

We would like to thank our clients who have helped us expand our products and design services. This has also helped us address additional packaging and shipping requirements and challenges.

These improvements have helped our clients improve their bottom line. The integrity of your material is maintained throughout the shipping process.

Below are a few examples of how QPI has addressed these additional shipping requirements and challenges.

Digital Image of every shipment:
This is Standard Operating Procedure with every shipment. An image of each shipment is taken FOB before leaving our facility. This has helped our clients resolve any shipping related claims by supplying visual documentation of the integrity of the shipment.

Wrapped with Water Proof and Oil Resistant Coverings:

When this method is determined, The entire shipment is wrapped to protect and ensure the quality upon delivery.

Custom Crating available:

We will supply a shop drawing of the crate for your approval before shipping. For international shipments, we use special "bug free" lumber so there will be no delays at the borders.

Additional shipping and handling services available:

An in-house Carpenter shop, we custom fit the skids to your shipment.

Easy Job Site handling, skids can be unloaded from the side off the flatbed.

Dedicated and Expedited, shipping offered (an extra fee may apply).

Please call us at any time, as we look forward to helping address any shipping and handling requirements.

Thank you again for your support and loyalty.
The QPI team.
