Choosing the Right Metal for Your Design: *A look at the differences between perforated metal, expanded metal and wire cloth.*

Metal Architecture is the leading authority on the use of metal in architectural applications and building design. Our own Bob Farber posted an article and talked about how you can address requirements and design challenges.

(posted in)

Metal Architecture

From function to aesthetics, perforated metal, expanded metal and wire cloth have many overlapping architectural applications. In recent years, suppliers have been working with architects to incorporate these materials into many new applications.

As the applications diversify, it's more important than ever for architects to distinguish the strengths and weaknesses of each material to achieve optimum performance and value.

This article will broadly compare the three materials against specific applications, providing tips on material selection.

Please click on any of the images to view the full article.

Please call us at any time, as we look forward to helping address any requirements and design challenges.

Thank you again for your support and loyalty.
The QPI team.
