QPI Doubles On Site Laser Capabilities with a Second TruLaser 1030!

In May 2011, QPI became the first perforator to have an on site laser capability. We have had so much success and found various ways to employ it in our current day to day business that we decided to install another one!

QPI can reduce your total part cost and eliminate costly inventory and secondary operations. Let us make your precision cut perforated parts supplied to your exact specifications. Our state of the art technology provides tolerances of 0.004".

QPI's in-house laser capability provides increased efficiency and reduced total cycle time. Faster turnaround on prototypes with no tooling cost!

Excellent Cut Edge Quality:

Material sheet range of 5' x 10'

Cutting Thickness:

Mild Steel & Carbon Alloys to 3/4"

Stainless & Aluminum to 1/4"

Let QPI add value to your products at the speed of light! Our accuracy, speed, variety and quality can't be beat!
