Tolerances for your perforated parts

Do you have a question about tolerances for your perforated parts? Are you designing a new part that requires perforated and are wondering what you can expect concerning shearing dimensions, squareness, and flatness or hole diameters? Visit www.qualityperf.com, click on the technical information tab, then Literature and scroll down to the IPA Handbook, or click on the image to the left.

You will gain access to a vast array of information about perforated applications, tolerances, cost cutting measures and valuable tables and formulas that are based on industry standards. Whether you are a designer, engineer or buyer, you will find this to be a very valuable tool that is only several clicks away.

Although there is a lot of information available here, you may still have questions. If so, please do not hesitate to call us at 1-800-872-7373 Ext. 100. Our customer service department can usually answer your questions immediately, but if not will get back to you in a timely manner with the answer you require.
