

THE PERFORATING PRESS

Volume 2

Quality Perforating, Inc.

Issue 10

Pride in our packaging materials and procedures.

At Quality Perforating Inc., we take great pride in our packaging materials and procedures. We purchase pre-fabricated stock size skids which are made to very exacting specifications.

We also have a carpenter shop that will make special skidding and crates.
Is your shipment going to be exported?

We use special “bug free” lumber so that there will be no delays at the borders. Do you have special requirements for packaging? QPI will be happy to accommodate your requests and even provide you with a shop drawing of the packaging for your review and approval.

QPI still uses metal banding, which we feel is the best available, as most of our shipments are on the heavy side and the banding is $\frac{3}{4}$ " wide and able to withstand 2,690 lbs.

Visual Documentation of file for every shipment!

You may remember that back in November of 2013 our newsletter pointed out that we take pictures of every order that leaves our shop after it is loaded on the truck. This has helped our customers resolve freight claims much faster when the material shows up at their door all over the truck.

At QPI we like to say, "Cradle to Grave", meaning that we are not happy until the material arrives at your dock ready for consumption.
