

Production Positions:

The position reports to the factory supervisor. Responsibilities include but are not limited to:

- Utility work including skid building, packing product for shipment, receiving material from suppliers.
- Production of metal products to customer specification.
- Work safely in a metal production facility.
- Make a positive contribution to a thriving and successful team of production personnel.
- Contributes to corporate goals for cost, quality and on-time delivery of product.

Production personnel contribute to the growth and profitability of QPI through their expertise and physical effort to convert raw material in to finished product. The position must be engaged with as a member of our operations team to achieve best performance for cost, quality and on-time delivery. Candidates must have verbal and written communication skills; proficiency in basic math, and the ability to learn and execute manufacturing instructions and operate equipment. The ability to read blueprints/drawings is a plus.

Successful applicants will work through a series of assignments to build company and industry specific skills such as:

- Factory and production environment to acquire knowledge of processes, materials, terminology and documentation.
- Familiarity with material types.
- Safety procedures and working safely in a manufacturing environment.
- Computer use for time keeping and production equipment.

QPI is an Equal Opportunity Employer, (EOE.)
